Introduction

Part I: Short project notes

The Theemsweg Route: A new high-level railway line	2
<i>Steven de Mos Wiljan de Moor</i>	
Randselva bridge, Norway: Designing and building solely based on BIM models	7
<i>Tiago Vieira Øystein Ulvestad Pedro Cabral Amund Geicke</i>	
Anti-terrorist concrete shields absorbing projectiles with no ricochets	10
<i>Jacek Katzer Janusz Kobaka</i>	
Negative moment cracking control method of continuous Steel-Concrete composite girder bridge based on UHPFRC thin layers	14
<i>Yaobei He Minghong Qiu XudongZhao Panpan Li Xudong Shao</i>	
Development of a novel type of steel-shell concrete composite tower	18
<i>Minghong Qiu Banfu Yan Haito Li Xudong Shao</i>	
Yihe Bridge on Beijing Road: The world's longest synchronous jacking constructed bridge	23
<i>Fangyuan Li Bolin Zhang</i>	
Rosensteinsteg II—A cable footbridge with deck elements of CFRP-reinforced concrete	28
<i>Martin Rettinger Alex Hückler Mike Schlaich</i>	
Chipperfield extension of the Kunsthaus Zurich	33
<i>Robert Koppitz Johannes Schindler Bruno Patt</i>	

Part II: Papers on Design & Construction

A work of art in concrete	39
<i>Michiel Niens Myrte Loosjes Pim Peters</i>	
First application of the balanced lowering method to build two bridges in Austria	53
<i>Johann Kollegger Dominik Suza Clemens Proksch-Weilguni Wolfgang Träger</i>	
Study on the perforation process of concrete targets against the impact by nondeforming projectiles	66
<i>Zhongcheng Mu Yile Hu Wei Wang Ji Yuan Yi Xuebin Cheng Xiaofeng Wu</i>	
Finite element numerical simulation of a cable-stayed bridge construction through the progressive cantilever method	82
<i>Igor Souza Hoffman Bruna Manica Lazzari Américo Campos Paula Manica Lazzari Alexandre Rodrigues Pacheco</i>	
Bridges of the Kāpiti expressway: Bridges on shaky ground	102
<i>Anton Kivell</i>	
Evaluation of the mechanical parameters of a reinforced concrete dam based on multi-source data	116
<i>Yaoying Huang Tong Xie Yao Xu Ronglu Wang</i>	
Optimization design on the section of curved composite box beam bridges	133
<i>Pengzhen Lu Qingtian Shi Dengguo Li Ying Wu</i>	
Sustainability in construction: The urgent need for a new ethics	151
<i>Borja Regúlez Duarte M.V. Faria Leonardo Todisco Miguel Fernández Ruiz Hugo Corres</i>	
Impact of carbon neutrality on structural concrete—Not a risk but an opportunity	173
<i>Akio Kasuga</i>	
3D-printed concrete footbridges: An approach to assess the sustainability performance	185
<i>Javier Asensio Irene Josa Andrea Monserrat Albert de la Fuente</i>	
A holistic life cycle design approach to enhance the sustainability of concrete structures	206
<i>Davide di Summa Matteo Parpanesi Liberato Ferrara Nele De Belie</i>
