

# Table of contents

Foreword	i
Preface	iii
1. Introduction	1
2. Provisions for durability performance specifications and conformity control	3
2.1 Durability performance indicators	3
2.2 Performance specifications and acceptance/conformity control	3
2.3 Examples of performance specification and acceptance/conformity control	3
2.3.1 Parametric example: compressive strength of ready-mixed concrete	4
2.3.2 Non-parametric example: on site air-permeability	4
3. Transport of liquids, gases, and ions in hardened concrete	7
3.1 Permeation	7
3.1.1 Liquids-permeability	7
3.1.2 Gas-permeability	8
3.2 Capillary suction	10
3.3 Diffusion	11
3.4 Migration	12
4. Properties describing / defining durability	16
4.1 General	16
4.2 Carbonation induced corrosion	17
4.2.1 General	17
4.2.2 Physical models for carbonation-induced corrosion	18
4.2.3 Performance indicators	21
4.2.4 Semi-probabilistic format	25
4.2.5 Full probabilistic format	25
4.3 Chloride-induced corrosion	27
4.3.1 General	27
4.3.2 Physical models for chloride-induced corrosion	28
4.3.3 Prescriptive rules on concrete composition and construction aspects	30
4.3.4 Rules by tests and measurements (Performance indicators)	30
4.3.5 Semi-probabilistic format	31
4.3.6 Full probabilistic format	33

4.4 Freeze-thaw degradation – Internal structural damage and scaling	37
4.4.1 General	37
4.4.2 Rules by tests and measurements (performance indicators)	38
4.4.3 Avoidance-of-deterioration approach	38
4.5 Chemical attack	39
4.5.1 General	39
4.5.2 Description of mechanisms and available physical models	39
4.5.3 Concrete composition prescriptive rules	49
4.6 Alkali–aggregate reactions and Delayed Ettringite formation	52
4.6.1 Alkali–aggregate reactions	52
4.6.2 Delayed ettringite formation	56
4.7 Abrasion, erosion, and cavitation	58
4.7.1 General	58
4.7.2 Abrasion	60
4.7.3 Erosion	61
4.7.4 Cavitation	63
4.7.5 Concrete composition prescriptive rules	63
4.7.6 Full Probabilistic format	64
4.8 Coupled deterioration mechanisms	64
4.8.1 General	64
4.8.2 Consequences of erosion by mechanical abrasion, frost scaling and leaching on reinforcement corrosion	65
4.8.3 Effect of Alkali Silica Reaction on reinforcement corrosion	65
4.8.4 Effect of leaching and carbonation on frost scaling and internal frost resistance	66
4.8.5 Effect of ASR on internal frost resistance	67
4.8.6 Effect of joint carbonation and chloride penetration	67
4.8.7 Effect of joint sulphate and chloride ingress	68
